Section I Philosophical Reflections

1. The Meaning of Geoethics

Silvia Peppoloni and Giuseppe Di Capua

The Birth of Geoethics	3
What Is Geoethics?	4
Issues with the Development of Geoethics	5
An Etymological Starting Point: Individual and Social Responsibility	6
Responsibility of Geoscientists	8
An Ethical Commitment: The Geoscientist's Promise	8
Outlook and Strategies for the Future	10
Conclusions: Questions for a Public Debate on Geoethics	11
References	13

2. Geoethics: Reenvisioning Applied Philosophy

Ingrid Leman Stefanovic

Part I: The Place of Ethics	16
Part II: Geoethics, Risk Assessment, and Environmental Decision Making	19
Part III: A New Role for Ethicists	21
References	22

3. The Imperative of Sustainable Development: Elements of an Ethics of Using Georesources Responsibly

Armin Grunwald

Challenge	26
Making the Vision of Sustainable Development Work	27

Sustainability Principles Relevant to Geoethics	29
Protection of Human Health	29
Securing the Satisfaction of Basic Needs	30
Sustainable Use of Renewable Resources	30
Sustainable Use of Nonrenewable Resources	31
Sustainable Use of the Environment as a Sink	31
Avoidance of Unacceptable Technical Risks	32
Conservation of Nature's Cultural Functions	32
Participation in Societal Decision-making Processes	33
Equal Opportunities	33
Sustainability Assessments for Geotechnologies and Geosciences	34
References	35
4. Ethics of Disaster Research	
<i>Ilan Kelman</i>	
Outline of the Problem	37
Interference with Disaster-Related Activities	39
Disaster Research Outcomes	41
Discussion	43
Conclusions	46
References	47
5. Toward an Inclusive Geoethics—Commonalities of Ethics in Technology, Science, Business, and Environment	
<i>Thomas Potthast</i>	
Domain and Challenges of Geoethics	50
Interdisciplinary Application-Oriented Ethics and the Tübingen Approach to Ethics in the Sciences	50
Cases and Fields of Geoethics	51
Professional Ethics of Scientific and Engineering Geosciences	51
Ethical Evaluation Procedures for Specific Projects	52
Respect for (Religions of) Nature and Dimensions of Land Ethics	54
Outlook: Geoethics and Sustainable Development	54
References	55
6. Humans' Place in Geophysics: Understanding the Vertigo of Deep Time	
<i>Telmo Pievani</i>	
Denialism in Science	57
Discussion: Counterintuitive Science and Our Teleological Minds	60

How Can One Answer Denialism in Science?	63
Conclusions	65
References	66

Section II

Geoscience Community

7. Research Integrity: The Bedrock of the Geosciences

Tony Mayer

Introduction	71
Some Famous Geoscience Cases	74
The World Conferences on RI and their Outcomes	75
The Singapore Statement	76
Conclusions	80
References	80

8. Formulating the American Geophysical Union's Scientific Integrity and Professional Ethics Policy: Challenges and Lessons Learned

Linda C. Gundersen and Randy Townsend

Introduction	84
Building the AGU Scientific Integrity and Professional Ethics Policy	85
Charge to the Task Force and Foundational Documents	85
Structure of the Policy	86
Challenges and Lessons Learned in Evaluating and Resolving Scientific Misconduct Allegations	88
Importance of Education and a Positive Research Environment	90
Conclusions	91
References	92

9. Ethical Behavior in Relation to the Scholarly Community: A Discussion on Plagiarism

Stefano Solarino

Introduction	95
Definition of Plagiarism	97
The Legal Aspects of Plagiarism	98
The Different Forms of Plagiarism	99
Detecting Plagiarism	100
Self-plagiarism	101
The Roles of Ethics and the Scientific Community	103
References	106

Section III

The Ethics Of Practice

10. When Scientific Evidence is not Welcome...

Paul G. Richards

11. M_{\max} : Ethics of the Maximum Credible Earthquake

Roger Bilham

Introduction	120
Right and Wrong: Gut Decisions and Approaching Danger	121
Earthquake Prediction and Forecast, and a Vulnerable Public	122
A Hypothetical Case of Nuclear Power Involving Ethical Decisions	125
Quantifying Future Earthquakes where Few Have Occurred Historically	127
Societal Pressures and Moral Principles	128
The Planned Jaitapur Nuclear Power Plant in India	130
Is M_{\max} Appropriate for Public Consumption?	131
M_{\max} in the New Madrid Seismic Zone	132
M_{\max} for the Himalaya	134
Discussion	136
Conclusions	137
Postscript	138
References	138

12. Geoethics: Tenets and Praxis

Two Examples from India

Vinod K. Gaur

Perspective	141
Tehri	142
Jaitapur	147
The Critique	150
The Epilogue	151
Appendix: The Context of Geoethics	152
Notes	156
References	159

13. Corporate Money Trumps Science

William Gawthrop (Retired)

Introduction	161
Where the Trouble Began	162
The Larger Study	164
The Fallout from These Studies	167

Conclusions	167
References	168
14. Shortcuts in Seismic Hazard Assessments for Nuclear Power Plants are Not Acceptable	
<i>Max Wyss</i>	
Introduction	169
The Assignment	170
A Compendium of Errors	171
The Resolution	173
Conclusions	173
References	174
15. Geoethical and Social Aspects of Warning for Low-Frequency and Large-Impact Events like Tsunamis	
<i>Stefano Tinti, Alberto Armigliato, Gianluca Pagnoni and Filippo Zaniboni</i>	
Introduction	176
Measurement Errors and Prediction Uncertainties	177
Accurate, Successful, Useful Predictions	178
Sources of Uncertainties in Tsunami Forecast Science	180
Tsunami Warnings	182
Tsunami Hazard	183
Tsunami Predictions and Tsunami Warning	185
The Optimal TWS	188
Conclusions	190
Acknowledgments	191
References	191
16. What Foreign Rescue Teams Should Do and Must Not Do in Muslim Countries	
<i>Mohamad amin Skandari</i>	
Introduction	194
What First Responders Should Do and Respect Generally	194
Humanity	194
Impartiality	194
Neutrality	195
Fair Allocation of Resources	195
Making Decisions under Fire	195
Meeting the Special Needs of Vulnerable Populations	195
What Humanitarian Workers and First Responders Should Do and Respect, When They Are Working in an Affected Muslim Community	196
Islam	196

Note	197
Conclusion	200
References	201

Section IV

Communication with The Public, Officials and The Media

17. Some Comments on the First Degree Sentence of the “L’Aquila Trial”

Marco Mucciarelli

What Should Have Been “Predicted”	206
The Role of Site Effects	207
The Benefit of Hindsight	207
Who Reassured Who	208
Is Earthquake Engineering “Pointless”?	209
Conclusions	209
References	210

18. Risk Management: Roles and Responsibilities in the Decision-making Process

Mauro Dolce and Daniela Di Bucci

Introduction	212
Scientists and Decision-makers	213
Other Actors Influencing Decisions and Their Responsibilities	217
Final Remarks	220
References	220

19. Communicating to the General Public Earthquake Prediction Information: Lessons Learned in Greece

Gerassimos A. Papadopoulos

Introduction	223
The VAN Predictions	227
Two Prediction Episodes	227
Prediction Episode 1: The September 7, 1999 Lethal Earthquake of Athens	228
Prediction Episode 2: The 2008 “Storm” of Earthquakes and Predictions	230
Concluding Remarks	235
References	236

20. Do Probabilistic Seismic Hazard Maps Address the Need of the Population?

Max Wyss

Introduction	240
The Need of the Population in Highly Seismic Regions to Know Their Risk	241
The Assumption Underlying the Probabilistic Method to Estimate Seismic Hazard and Risk	242
The Arbitrariness Governing the Probabilistic Method to Estimate Seismic Hazard and Risk	243
Testing the Probabilistic Method to Estimate Seismic Hazard and Risk	244
The Deterministic Approach to Assist the Population in Understanding Their Earthquake Risk	247
Conclusions	248
References	248

21. Reflections on Ethics in Mapping as an Instrument and Result of Disaster Research

Jessica Heesen, Daniel F. Lorenz, Martin Voss and Bettina Wenzel

Part I: The Concepts of Risk, Vulnerability, and Resilience	252
Concepts of Risk	252
Concepts of Vulnerability	252
Concepts of Resilience	252
Part II: Mapping as Selective Representations	253
Forms of Selection	253
Reduction from Qualitative Processes to Quantitative Data	254
Selections as Origins of Interpretation	256
Part III: Ethical Questions of Risk Management and Interpretation of Maps	257
Conclusions	260
References	260

22. Geoethics, Risk-Communication, and Scientific Issues in Earthquake Science

Robert J. Geller

Introduction	264
L'Aquila-like Hypothetical Case	264
Funding and Ethics	266
Earthquake Prediction in Japan	266
The Fukushima Nuclear Accident	268

Conclusions	270
References	271
23. Extreme Sea Level Events, Coastal Risks, and Climate Changes: Informing the Players	
<i>Eduardo Marone, Juliane C. Carneiro, Marcio M. Cintra, Andréa Ribeiro, Denis Cardoso and Carol Stellfeld</i>	
Introduction	274
Coastline Changes in Response to Sea Level Rise	277
The Area Studied	277
The Local Dynamic	279
Method	280
IPCC Scenarios	282
Scientific Results	283
Discussion	297
Conclusions	298
Final Remarks	299
Acknowledgments	301
References	301
Section V	
Natural and Anthropogenic Hazards	
24. Thoughts on Ethics in Volcanic Hazard Research	
<i>Jurgen Neuberg</i>	
Appropriate Method for Forecasting and Volcanic Risk Assessment	306
Biases in Communicating Volcanic Hazard and Risk	308
Volcanic Research Assets: Hoarding or Sharing	310
Conclusions	311
References	312
Further Reading	312
25. Ethical Issues in the Decision-making for Earthquake Preparedness, Prediction, and Early Warning: A Discussion in the Perspective of Game Theory	
<i>Zhongliang Wu</i>	
Introduction	314
The “Seismo-Illogical Cycle”	314
The Ethical Paradox	316
Policy Selection Related to Earthquake Prediction	317
Concluding Remarks and Discussion	320

Acknowledgments	320
References	320
26. Geoethics and Risk-Communication Issues in Japan's Disaster Management System Revealed by the 2011 Tohoku Earthquake and Tsunami	
<i>Megumi Sugimoto</i>	
Japan's Tsunami Countermeasures before the Tohoku Earthquake	324
Official Warning Information in 2011	326
Field Reports from Disaster Areas	329
Fukushima Dai-ichi Nuclear Power Station Accident	331
Japanese Research System	332
Dissemination of Information on Radioactive Particle Dispersion	332
Conclusions	332
Acknowledgment	333
References	333
27. "When Will Vesuvius Erupt?" Why Research Institutes Must Maintain a Dialogue with the Public in a High-Risk Volcanic Area: The Vesuvius Museum Observatory	
<i>Maddalena De Lucia</i>	
Introduction	336
Previous Studies and Analysis on Public Communication of Volcanic Hazard	338
The Case Study of the Museum of Vesuvius Observatory	342
Analysis by/of the Public of the Museum of Vesuvius Observatory	343
Categories	344
Temporal Distribution	345
Origin of Visitors	346
Conclusions	347
References	349
28. Voluntarism, Public Engagement, and the Role of Geosciences in Radioactive Waste Management Policy-Making	
<i>Nic Bilham</i>	
Failure of the Technocratic Approach to Radioactive Waste Management	352
Developing a New RWM Framework for the UK	353
Discussion and Conclusions	356
References	358

29. Nuclear Waste Repositories and Ethical Challenges

Peter Hocke

Introduction	360
The Specific Complexity	360
Normative Ethics and Spaemann's Contradiction	362
Responsibility in Late-Modern Societies	364
Conclusions	365
References	367

Section VI

Low Income and Indigenous Communities

30. Mining in Indigenous Regions: The Case of Tampakan, Philippines

Daniel Hostettler

Increasing Demand for Natural Resources	372
Indigenous Peoples' Right to Determine Their Own Development	373
Diverging Interests between Investors and Affected Communities in Mining Projects	375
The Case of the Tampakan Copper–Gold Project in the Philippines	376
Free	377
Prior	378
Informed	378
Consent	379
Conclusions	379
References	380

31. On the Vulnerability of the Indigenous and Low-Income Population of Mexico to Natural Hazards. A Case Study: The Guerrero Region

F. Ramón Zúñiga, Janette Merlo and Max Wyss

Introduction	382
Some Basic Demographics of the State of Guerrero, Mexico	384
The SOVI from Ethnic Factors	384
Discussion	385
Estimating the Relative Impact of Earthquakes on Large and Small Communities	387
Conclusions	389
Acknowledgments	390
References	390

32. Ethics and Mining—Moving beyond the Evident: A Case Study of Manganese Mining from Keonjhar District, India

Madhumita Das

Introduction	394
The Missing Ethics of Mining	394
Mining and Health	395
Living in the Midst of Manganese Dust and Contaminated Sewage	396
Mining in Odisha	397
A Case Study of Manganese Mines	397
Manganese Toxicity	399
Air and Noise Quality	400
Chemical Quality of Water	401
Results and Discussion	401
Mining Laws and Regulations: Are They Implemented?	402
Conclusions	404
References	405

33. Geoethics and Geohazards: A Perspective from Low-Income Countries, an Indian Experience

Shrikant Daji Limaye

Introduction	410
Historical Background of Geoethics	410
Geohazards and Application of Geoethics	412
Creating Preparedness or Awareness in the Society	412
Mitigating Geohazards	415
Discussion and Conclusions	416
References	417

Index	419
